Squat - King of All Exercises

Squatting could be the answer to living longer, says expert - try sitting test at home

One study, involving 2,000 people, proved that the ability to sit and rise from the floor was linked to living longer.

How to live longer: One exercise that could add years to your life expectancy

SITTING for long periods of time, and general inactivity, can lead to a number of health problems. Therefore, to increase our life expectancy and lead healthier lives, the NHS advises that we exercise regularly, at least 150 minutes a week, and reduce sitting time.

The BENEFITS of Squats

Strengthen Core Muscle Group

Glutes and quadriceps

Boost Bone Mineral Density

Adds strengths to your skeleton, mainly **lower body**

Sustain Body Functionality

The ability of sit-and-rise may predict your chance of dying early

The CONs of doing WRONG SQUATS

Back Injury

Knee Injury

Does not Strengthen muscle

02

PROBLEM STATEMENT

The project aims to...

Empower individuals to improve their health and fitness by

- (i) learn how to do a correct squats independently;
- (ii) assess their squat count;
- (iii) improve their squat form.

03

STREAMLIT DEMO

AI Squat Training Assistant Demonstration

The AI Squat Counter computes your squat count for you.

The probability shows the probability of your state.

The AI Squat Enhancer gives you feedback on your correct and incorrect squat.

When your squat is incorrect, it will display text to inform you how to improve it.

Squat Counter

Live Version

Live AI Squat Counter

The system will analyze your body posture and keep track of the number of squats you perform.

Instructions:

1. Press start to start the machine camera.
2. Move sufficiently far and side face camera.
3. Press stop when you finish doing squats.
